This is a collection of all AGU Fall 2018 Conference Presentations that are related to permafrost. Presentations are in chronological order and were searched for on the [AGU Fall 2018 website](#) using key terms (below) related to permafrost (many from the [Permafrost Monthly Alert \(PMA\) program](#)). The section, “First Author,” is sometimes represented by the presenting author if the first author is not presenting. This document is also searchable for other key terms of interest (i.e. groundwater) using “Ctrl+F”.

Key terms: permafrost, frozen ground, active layer, frost action, ground ice, ice level, ice wedge, solifluction, tundra soil, cryosol, periglacial, and cryoplanation.
